

Rishav Kumar

Full Stack Developer • B.E. Information Science Student

+91-6204627879 • rishavkumar7035@gmail.com • GitHub • LinkedIn • Website • Bengaluru, India

Professional Summary

Full Stack Developer and Information Science undergraduate with hands-on experience building end-to-end web applications using React.js, Node.js, and FastAPI, along with RESTful API design, database architecture, and cloud deployment. Oracle Certified AI Foundations Associate skilled in integrating AI/LLM capabilities into full-stack products. Strong foundation in Data Structures, DBMS, Operating Systems, and Computer Networks.

Technical Skills

Languages: C ,Java, Python

Frontend: HTML5, CSS3, Tailwind CSS ,JavaScript React.js,

Backend: Node.js, Express.js

Databases: MongoDB, MySQL

Cloud & Deployment: Docker, AWS, Render, Vercel, CI/CD

AI & Machine Learning: LangChain, Retrieval-Augmented Generation (RAG), Prompt Engineering, Generative AI, Large Language Models (LLMs)

Developer Tools: Git, GitHub, Linux, Postman

Core CS: Data Structures and Algorithms, Object-Oriented Programming, Operating Systems, Database Management Systems, Computer Networks

Soft Skills: Problem Solving, Team Collaboration, Communication, Adaptability

Projects

LogIntelligence – Intelligent Log Analysis Platform(GitHub — Live Demo)

Jul 2026

Next.js, React.js, TypeScript, Tailwind CSS, FastAPI, Python, SQLite, LangChain, Ollama (Llama 3)

- Built a full-stack platform that transforms production logs into structured incident reports and guided SRE investigation workflows.
- Developed a deterministic rule engine with technology-specific playbooks supporting PostgreSQL, Redis, MongoDB, Kafka, RabbitMQ, Docker, and Kubernetes.
- Integrated LangChain with Ollama to generate incident summaries while validating operational commands through backend rules.
- Designed an interactive investigation workspace with recovery steps, verification checklists, and configuration patch recommendations.

CloudDeploy – Automated Cloud Deployment Platform (GitHub)

Apr 2026

React, Vite, Node.js, Express, Socket.IO, Redis, Docker, AWS ECS, AWS S3, AWS ECR

- Built a full-stack deployment platform that lets users submit a GitHub repository and deploy it to a live subdomain URL through a web dashboard.
- Designed a dashboard-triggered deployment flow that launches an isolated AWS ECS Fargate task per deployment, with automatic project-type detection for static sites, Vite, CRA, and Next.js static exports.
- Implemented real-time build log streaming to the dashboard using Redis Pub/Sub and Socket.IO, with build artifacts stored in AWS S3.
- Built a custom reverse proxy for wildcard subdomain routing, including single-HTML fallback support for simple static sites.

CivicSim – AI Powered Civic Transparency Platform (GitHub)

Jul 2025

Python, React.js, FastAPI, OCR, Machine Learning

- Led end-to-end development of an AI-powered civic transparency platform achieving more than 90% OCR accuracy across 100+ public documents.
- Developed FastAPI backend services and integrated them with a React frontend, delivering a full-stack solution for real-time analytics.
- Built dashboards for monitoring fund allocation and identifying anomalies using OCR and machine learning.
- Secured **2nd Place** at the Srujana Hackathon 2025 for the project.

Certifications

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate – *Oracle University* (Oct 2025)
- Introduction to Prompt Engineering for Generative AI – *LinkedIn Learning* (Sep 2025)
- SQL (Basic) Certification – *HackerRank* (2025)

Achievements

- Awarded **2nd Place** at **Srujana Hackathon 2025** for developing an AI-powered civic transparency platform.
- Awarded **3rd Place** at the **ImpactX'25 Hackathon** for building an innovative AI-powered solution.
- Solved **150+ Data Structures and Algorithms** problems across LeetCode and other coding platforms.

Education

Acharya Institute of Technology, Bengaluru

2023 – 2027

Bachelor of Engineering in Information Science and Engineering

CGPA: **8.20 / 10**
